

RIFQI SIGWAN NUGRAHA

SOFTWARE ENGINEER

rifqisigwannugraha@gmail.com | +62 822 4632 6670 | LinkedIn: Rifqi Sigwan Nugraha | Instagram: @rfqsn_

PROFESSIONAL SUMMARY

Information Technology graduate (Telkom University, GPA 3.80/4.00, Bank Indonesia Scholarship Awardee) with hands-on backend engineering experience across IoT, AI-driven, and full-stack web platforms. Comfortable owning a task end to end: scoping the problem, building the smallest solution that works, shipping it safely, and following through when things get hard. Builds with Python, PostgreSQL, Next.js, and PHP, with 2 years of experience developing alongside AI coding assistants and agents, and applies critical judgment on their output rather than shipping on faith. Co-founder of a software agency and active open-source security researcher, with a bias toward taking initiative and figuring things out.

WORK EXPERIENCE

Co-Founder | Plus The Site

2025 - Present

- Directed end-to-end digital platform development, aligning product roadmap with market requirements.
- Synchronized team collaboration across design, development, and marketing workstreams to meet milestones.
- Selected as participant of the SIAP 2025 Acceleration Program by Kementerian Ekonomi Kreatif (Kemenekraf).

Research Assistant | Hardware & Embedded System Lab, Telkom University

Sep 2024 - Jan 2026

- Built and deployed an IoT water monitoring and flood early-warning system serving ~300 households, covering sensor integration, solar power, and a web dashboard for real-time data.
- Redesigned the BUMDes-PDAM administrative workflow into a user-centered web platform.
- Owned research project timelines and data workflows across embedded systems, AI, and IoT applications.

Backend Engineer Intern | AI Surveillance Dashboard

Jul 2025 - Aug 2025

- Developed backend services, data pipelines, and RESTful API endpoints integrating 10+ computer vision models over WebSocket connections.
- Coordinated deployment schedules across cross-functional teams and monitored performance metrics for uptime.

PROJECT EXPERIENCE

Dashboard MSU

Nov 2025 - Jan 2026

- Architected a centralized PostgreSQL database and admin control page for a full-stack mosque and university reporting ecosystem. Tech: Next.js, PostgreSQL.

Sigwan ATK POS System

Jan 2026 - Apr 2026

- Built a retail point-of-sale system for inventory tracking, transactions, and real-time sales reporting. Tech: PHP, JavaScript.

Ayo Beraksi 2025 - Qoffea (PT Telkom Indonesia)

Sep 2025 - Nov 2025

- Engineered data integration pipelines and backend infrastructure for an AI coffee-assessment platform. Tech: Python.

AI Surveillance Dashboard

Jul 2025 - Aug 2025

- Backend development supporting real-time data analytics, smart alert pipelines, and monitoring intelligence. Tech: Python.

Tel-U Great Planner Academic

Jun 2025

- Built an academic planning app with automated GPA computation, data tracking, and grade projections. Registered computer program copyright with the Indonesian Ministry of Law.

Innovillage - Rewana (PT Telkom Indonesia)

Oct 2023 - Feb 2024

- IoT-based flood early-warning system; Top 163 National Finalist. Tech: C++, HES & IoT, PHP.

AI-ASSISTED DEVELOPMENT

- 2 years of hands-on experience building with AI coding assistants integrated directly into the delivery workflow, not just as autocomplete.
- Designed and run a multi-agent AI development pipeline (analyst/PM, backend, frontend, data, and QA/security agents orchestrated through Claude Code) that plans, builds, and reviews real project work, with a human review gate before anything ships.
- Practiced at evaluating AI-agent output critically and catching when it is wrong, rather than shipping on faith.

INDEPENDENT SECURITY RESEARCH

- Identified and reported a client-side audio-restoration vulnerability on TikTok through a formal HackerOne submission, applying independent critical analysis outside of formal work scope.

EDUCATION

Universitas Telkom - Bandung, Indonesia	<i>Sep 2022 - Jan 2026</i>
Bachelor of Information Technology, GPA: 3.80/4.00	
- Bank Indonesia Scholarship Awardee (2024-2026) - academic excellence & leadership potential - National Finalist: Innovillage (2023 & 2024)	
MAN Insan Cendekia Jambi - Jambi, Indonesia	<i>Jul 2019 - Jun 2022</i>
Senior High School, Natural Science, Final Grade: 93.00/100.00	
Provincial Finalist - National Science Olympiad (Astronomy)	

ORGANIZATIONAL & LEADERSHIP EXPERIENCE

- External Coordinator, Hardware & Embedded System Lab (2025 - 2026)
- Unit Head, Unit Asrama Masjid Syamsul 'Ulum (2024 - 2025)
- Chief Officer, PMB I-FEST (Islamic Festival) - Al-Fath (Jul - Sep 2024)
- Advisory Board, GenBI - Generasi Baru Indonesia (2025 - 2026)
- Public Relations Staff, GenBI - Generasi Baru Indonesia (2024 - 2025)
- Head of Ramadhan Dept., PRADA 1445 H - DKM Syamsul 'Ulum (Dec 2023 - Jun 2024)

AWARDS & CERTIFICATIONS

- Computer Program Copyright: "Tel-U Great Planner Academic" (Reg No: 000925616), Ministry of Law Republic of Indonesia (2025)
- BNSP Digital Marketing Certification (2024)
- Finalist Top 163, INNOVILLAGE 2023, Telkom Indonesia (2023)

SKILLS

Software & Backend Engineering: Python, SQL (PostgreSQL), Next.js, PHP, C++, REST API Design, Backend Architecture, Data Pipelines, AI-Assisted & Agentic Development

Data & Analysis: Data Analysis, Data Visualization & Reporting, IoT Systems

Management & Strategy: Business Development, Project Management, External Relations, Leadership, Agile/Sprint Planning
